Adjusta Ladder™
Stationary elevator pit ladder engineered to fit various car-to-wall clearances and maximize center of rung to wall

- 4½" to 7" clearance wall to center of rung in ½" increments. Each ladder comes equipped with mounting brackets that have a combination of hole spacing that allow the ladder to be installed from center of rung to wall at the code minimum 4½", or 5", 5½", 6", 6½" and the code ideal 7" rung-to-wall for full OSHA and ASME A17.1-1996 - 2013 compliance.

- Wall to rung spacing is determined by placing the ½" bolts in the desired combination of ladder mounting bar and bracket pre-drilled holes.

- The design allows the ladder to be closer to the access door by mounting it with only the necessary running car clearance, maximizing the foot’s toe space, making for a safer ladder and less hazardous pit access.

- Traction Tread™ rungs, slip-resistant & self-cleaning for ideal multi-direction grip and exceptional strength.

- OSHA Safety Yellow powder coat painted for optimal visual safety and rust protection.

- 3' (#AL36) thru 13' (#AL156) pit depths and 16", 12" & 9" wide rungs are standard.

- Modular design for ease of handling and reduced shipping cost.

- Strongest and safest stationary elevator pit ladder on the market.

- Made with pride in the USA.
