

SmartGate Ladder™ Ordering Guide

1. Pit depth: _____”

- Measure the distance from pit floor where the ladder will be installed to the top of the sill at the access landing

2. Required rung width: 16”

- 2022 A17.1/B44 requires 16” wide rungs

3. Full Rung Top: are horizontal handholds / rungs for the 48” section above the landing sill required?

CIRCLE:

YES

NO

- This is a requirement in the states of Oregon and Washington and may sometimes be spec’d
- Required for this ladder type due to its design, the guard blocks the ability to grasp the vertical riser at the hinge side of the guard

4. Hand of Ladder (check box):

- R.H.** – for right hand entrances and where the ladder is located at the right-hand side of the hoistway, from perspective of looking into hoistway from lobby
- L.H.** – for left hand entrances and where the ladder is located at the left-hand side of the hoistway, from perspective of looking into hoistway from lobby

- Note: Ladders are field reversible

5. If ladders installed on divider beam,

- Quantity of *Divider Beam Kits*™ required _____
(one kit supports two back-to-back ladders)
- Quantity of ladders that will be installed on divider beams _____

6. Total Quantity of Ladders Required _____
